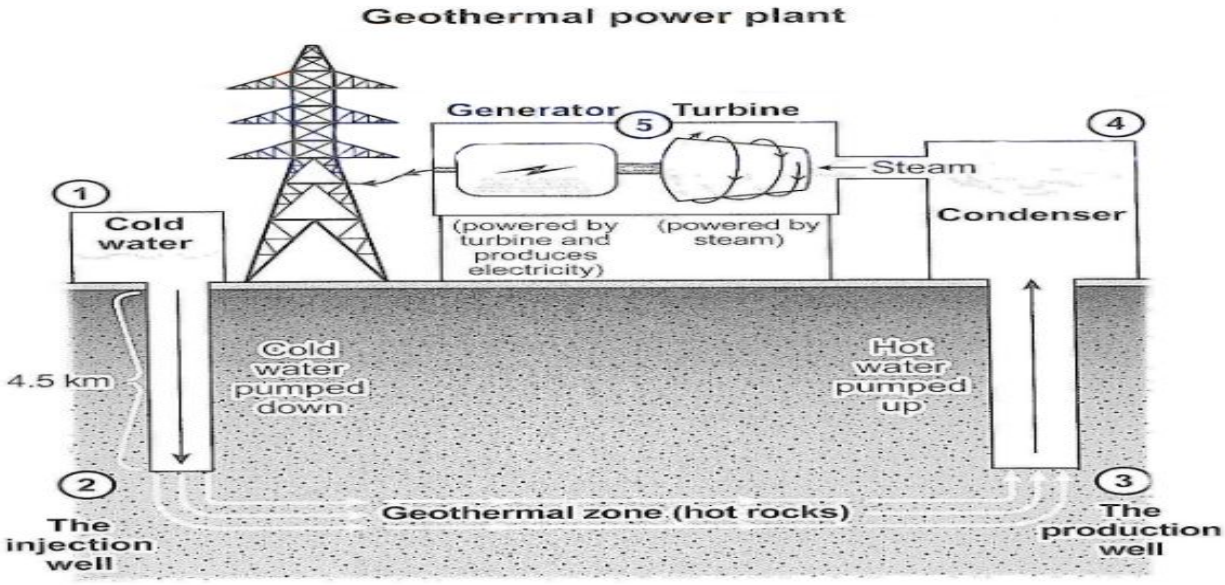
Writing Task 1



Question:

You should spend about 20 minutes on this task. Write at least 150 words.

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Student Answer:

The diagram illustrates how the geothermal power palnt is used to create electricity.

Overall, the process is a linear process with five different stages. There is a height recommendation too for both of the pumps. Moreover, cold water turns hot through a geothermal zone and thus steam is produced to finally generate elecrticity.

To commence with, the stored cold water goes down through a 4.5 km deep pump and there is the injection well. After that, it traveles the geotehrmal zone where the hot rocks of the earth are. And it finally comes to the other pump of the other side as hot water where the production well is. The hot water pump is formed in up-ward way (exactly the same height as the first one) so that the steam can be stored in condenser.

Furthermore, the condenser produces steam which is connected with generator turbine. The generator turbine gets powered by hot steam and finally the power palnt is seem to produce electricity.

Writing Task 2

Question:

You should spend about 40 minutes on this task. Write at least 250 words.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Access to clean water is a basic human right. Therefore, every home should have a water supply that is provided free of charge.

Do you agree or disagree?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Student Answer:

In 2026, water allocation has become a huge concern as environment is polluting severely even though it collides with basic human right. Therefore, it has become a debate amongst two groups of people. While some folks believe clean water should be provided everywhere for free, others do not support this idea. I firmly disagree with the statement that fresh water should be accessible for the entire population without charge.

Initially, exessive clean water supply without accountability is a waste of natural source because people then will not be responsible enough towards the environment. Thus, a tons of fresh water will be wasted and will be rare to have in need. For instance, if an area is provided with free fresh water supply everywhere then, the residents will not care if their portable water is going into the drain. And it will be very hard to manage water in the time of need.

Addionally, farming water as a free commodity can strain public budgets. Where a lot of town with inadequate pipes and waterlines systems exist. In order to supplying clean water there, it will cost a lot. So ultimately adequate water for drinking, cooking, cleaning, and hygiene is enough.

However, there are some folks who oppose this and pulls the human right fact, where I am not denying this fact. But, cost free water supply will not be a generous idea to imply. Because economic world has shown when the product is priced at zero, consumers have fewer incentives to conserve.

In conclusion, even though a lot of individuals think to have this access of clean water all around the world for free becuase it is undoubtedly a basic human right, the management is harder to apply. So, I strongly disagree with the statement of providing water everywhere without costing.

Examiner Report: Task 2

Overall Band Score: 6

TASK RESPONSE: 6
COHERENCE COHESION: 6.5
LEXICAL RESOURCE: 5
GRAMMATICAL RANGE: 5

Examiner Comments:

Hello! I've reviewed your essay, and I want to start by commending your clear stance and the logical structure you've used to present your arguments. You've clearly addressed the prompt and made your position very apparent from the introduction right through to the conclusion. This is a crucial foundation for a good IELTS essay, and you've done well here!

Strengths:

* **Task Response:** You've understood the prompt perfectly and consistently maintained your position throughout the essay. Your arguments against free water supply (waste, budget strain, lack of conservation) are relevant and directly address the question. You also acknowledge the counter-argument about human rights, which adds depth to your discussion.
* **Coherence and Cohesion:** This is a strong area for you. Your essay is well-organized with clear paragraphing, each focusing on a distinct idea. You've used a good range of linking words and phrases (e.g., 'Initially,' 'Additionally,' 'However,' 'In conclusion,' 'Thus,' 'For instance') that guide the reader smoothly through your points. The logical flow of your ideas makes your essay easy to follow.

Areas for Development:

* **Lexical Resource (Vocabulary):** While you use some good topic-specific vocabulary (e.g., 'allocation,' 'accountability,' 'commodity,' 'incentives,' 'conserve'), there are instances where word choice is either informal ('folks'), imprecise ('farming water,' 'pulls the human right fact'), or where there are noticeable spelling errors ('exessive,' 'Addionally,' 'becuase'). Expanding your vocabulary and focusing on precision and formality will significantly help.
* **Grammatical Range and Accuracy:** You attempt a mix of simple and complex sentence structures, which is excellent. However, frequent grammatical errors sometimes obscure meaning or require re-reading. Areas to focus on include subject-verb agreement, correct use of articles, prepositions, sentence structure (avoiding run-ons), and verb forms. Consistent accuracy will make your arguments much more compelling and clear.

Keep up the great work on your structure and clear argumentation! By focusing on refining your language accuracy and expanding your precise vocabulary, you will undoubtedly see a significant improvement in your writing.

In 2026, water allocation has become a huge concern as environment is polluting severely even though it collides with basic human right.	In 2026, water allocation has become a huge concern as the environment is being polluted severely, even though access to clean water is a basic human right.	Corrected verb form for 'is polluting' to passive 'is being polluted' or rephrased for clarity. Clarified the subject of the 'human right' clause and improved its connection to the preceding statement.
it has become a debate amongst two groups of people.	it has become a debate among two groups of people.	'Among' is generally used for more than two, but 'amongst' is less common. 'Between' would be used for exactly two. 'Among' works well here.
While some folks believe	While some individuals believe	'Folks' is informal for an academic essay. 'Individuals' or 'people' are more appropriate.
Initially, exessive clean water supply without accountability is a waste of natural source	Initially, excessive clean water supply without accountability is a waste of a natural resource	Corrected spelling of 'excessive' and improved noun phrase 'natural source' to 'natural resource' with an article.
a tons of fresh water will be wasted	a ton of fresh water will be wasted (or 'tons of fresh water')	Corrected 'a tons' to 'a ton' (singular, implying a large amount) or plural 'tons'.
if their portable water is going into the drain.	if their potable water is going into the drain.	'Portable' means easy to carry. 'Potable' means safe to drink.
Addionally, farming water as a free commodity can strain public budgets.	Additionally, supplying water as a free commodity can strain public budgets.	Corrected spelling of 'Additionally'. 'Farming water' is incorrect here; the context implies providing/treating water for consumption.
Where a lot of town with inadequate pipes and waterlines systems exist. In order to supplying clean water there, it will cost a lot.	Many towns have inadequate pipe and waterline systems. In order to supply clean water there, it will cost a lot.	Corrected the run-on sentence and 'a lot of town' to 'many towns'. Improved 'waterlines systems' to 'waterline systems' or 'water infrastructure'. Corrected 'in order to supplying' to 'in order to supply'.
there are some folks who oppose this and pulls the human right fact,	there are some individuals who oppose this and raise the human rights issue,	Replaced informal 'folks' and improved the phrasing 'pulls the human right fact' to 'raise the human rights issue'.
where I am not denying this fact.	which I am not denying.	'Which' is more appropriate here to refer to the preceding clause.
cost free water supply will not be a generous idea to imply.	a cost-free water supply would not be a prudent idea to implement.	Added hyphen for 'cost-free', improved 'generous idea to imply' to a more fitting and precise 'prudent idea to implement'.
Because economic world has shown when the product is priced at zero	Because economic principles have shown that when a product is priced at zero	Improved 'economic world' to 'economic principles' and added 'that' for better flow. Also added an article before 'product'.
even though a lot of individuals think to have this access of clean water all around the world for free becuase it is undoubtedly a basic human right, the management is harder to apply.	even though many individuals believe that access to clean water should be provided all around the world for free because it is undoubtedly a basic human right, its management is harder to implement.	Improved phrasing 'think to have this access' to 'believe that access... should be provided'. Corrected spelling of 'because'. Clarified 'the management' to 'its management' and improved 'harder to apply' to 'harder to implement/sustain'.
without costing.	without charge.	'Without cost' or 'without charge' are more

		natural phrases in this context.

Key Suggestions for Improvement:

1. Enhance Grammatical Accuracy: Pay close attention to common errors like subject-verb agreement, article usage (a/an/the), and prepositions. Practice exercises specifically targeting these areas. Regularly proofread your work for these specific types of mistakes.

2. Expand and Refine Vocabulary: Focus on using precise and academic vocabulary. Replace informal words (e.g., 'folks') with more formal synonyms (e.g., 'individuals,' 'people'). Keep a notebook of new topic-specific vocabulary and collocations, and try to incorporate them accurately into your writing.

3. Master Complex Sentence Structures with Accuracy: You attempt complex sentences, which is great for a higher band score. However, ensure these are grammatically correct and clear. Practice combining ideas using a variety of conjunctions and relative clauses, focusing on maintaining accuracy.

4. Develop Arguments More Fully: While your arguments are clear, some could benefit from further elaboration. For instance, after stating 'adequate water... is enough,' briefly explain *why* this limitation is acceptable or necessary given the costs, linking it more directly to your main stance.

5. Thorough Proofreading: Always allocate a few minutes at the end to carefully proofread your essay. Read it aloud to catch awkward phrasing, and specifically check for spelling errors, punctuation mistakes, and the grammatical issues highlighted above. This dedicated check can significantly improve your score.
